HEATING

92AF

High-Efficiency Gas Furnace

Raise your comfort level, while enjoying lower utility bills

The 92AF gas furnace has an energy efficiency rating of 92% AFUE, which means it can save you hundreds of dollars each year on your utility bills, compared to older, less-efficient furnaces. A multi-speed blower motor allows the airflow to be set to meet your specific home comfort needs.

Take even more comfort in long-lasting performance

When temperatures drop outside, you want a furnace that you know will provide consistent, reliable warmth. The 92AF delivers, with robust components that are built to last. The aluminized-steel heat exchanger—the part of the furnace that moves the heat produced by the furnace into your home—allows maximum heat output with minimum resistance to airflow with a unique weld-free crimp design. The dependable hot-surface ignition, supported by self-diagnostic controls, provides dependable, efficient heat when you need it most.
